

Appendix to Kristian Bandlien Kraft, Anna Aasen Godøy, Kristin Hestmann Vinjerui, Prabhjot Kour, Marte Karoline Råberg Kjøllesdal, Thor Indseth. COVID-10 vaccination coverage by immigrant background. *Tidsskr Nor Legeforen* 2022; 142. doi: 10.4045/tidsskr.21.0799. This appendix is a supplement to the article and has not undergone editorial review.

Appendix 3: Odds ratio for not having received at least one dose of a coronavirus vaccine as of 21st October 2021, stratified by country of background with 95% confidence intervals. Models estimated separately for Norwegian-born individuals with foreign-born parents, and for foreign-born individuals who have been resident in Norway for different lengths of time. All models are adjusted for age, sex, risk group, county (as before the 2020 boundary reform), household income, and education.
